America Unearthed

Civilizations past made their mark on the earth, but just how deep does it descend into North American soil? *America Unearthed* bares the archaeological secrets buried beneath our feet while challenging official stories and societies within our nation's terra firma. As **H2** digs into 13 one-hour episodes, forensic petrography pioneer and real-life Indiana Jones, Scott Wolter, edges into the earth's nooks and crannies exposing unexplained artifacts, ancient symbols and a world previously undetermined. As each fragment is uncovered, a new layer of America's history is revealed ... and rewritten.
